Strawberry Leaf Cent Ripens To $862,500 Florida Auctions At $25 Million And Counting

Florida has always been a location noted for winter migration. It is therefore fitting that a hardy flock of numismatic faithful have landed in Orlando to kick off the new year. By the show's conclusion, nearly 15,000 lots will have fallen under the hammer and miles of traversed bourse will have accounted for many tired feet. While opinions, as always, vary with regard to the current health of the market, there is no arguing that Copper material, in particular early Large Cents, is hotter than a pistol. A telling example of this heat is the sale of the finest known 1793 Strawberry Leaf Cent. This NGC F12 extreme rarity was hammered home in Stack's pre-FUN auction for an amazing $862,500. Not only is this the new record price paid for any Large Copper, it also more than doubled its price realized from its first appearance back in late 2004 as a part of the Frog Run Farm collection where it brought home $414,000. By any calculation, this is a triumphant escalation, but it's even more important considering the current economic environment.

All things considered, Florida is definitely keeping things warm in the certified market. Already in the books are a trio of pre-FUN auctions accounting for a not too shabby $10.5 million. Superior's foray in the modern certified arena featuring the "JHF" Silver Roosevelt Dime collection indicates that top notch registry material will bring record prices. One only needs to look at the superlative roster of certified Roosies that brought literally hundreds and even thousands of times the price of a coin grading just a few points under those offered in that collection. Both Bowers & Merena and Stack's had superb results, yet in some cases, reserves based on yesterday's market likely held back the sell-through rate. As we go to press, the host auction by Heritage had already cleared an impressive $13.8 million through the 4th of a marathon twelve-session affair, and no fewer than 41 certified treasures had already closed or cleared reserves and had eclipsed the six-figure plateau. Leading the remarkable run was the vaunted 1877 Half Union struck in Copper from the Lemus collection. The NGC PR67BN legendary ultra rarity reeled in $575,000 from a floor Bidder. Professional dealers and ardent collectors will have little time to bid a fond adieu to Mickey as many will be making a beeline to the Big Apple upon the show's conclusion. Stack's will be the next rendezvous for the road show, showcasing their varied and eclectic Americana Sale in New York running Jan 12-14. We have listed several of the many highlights within.

The sight-unseen market confirms that what is plentiful, such as Classic Silver Commems, continue to slide—seemingly irrespective of the grade. A batch of nearly two dozen confirms this as lightweights and heavyweights alike, such as the Alabama 2X2, Hudson, Missouri 2X4 and Pan-Pac shuffle back. Even Classic Gold with its low mintages is easily replaceable. As 8 of the 11-piece contingent are observed sliding back, even the proud $50 Pan-Pac Round version is taking a beating. Morgan Dollars discover the low population MS66 1892 entry riding a 25% advance for PCGS specimens. With that said, a quartet of higher grade and priced NGC slabs each takes a double-digit dive led by the MS66 1880/79 CC (rev. 78) falling to $2,500. Peace Dollars didn't relinquish much, yet a pair of bargains were had when a 1921 NGC MS64 example sold via internet auction for $575, while a standing sight-unseen offer of $635 remains in place. A popular NGC MS64 1928S slab realized $633 with a current sight-unseen Bid of $800 watching. Mercs continue to look for some action as a desirable, high-grade quartet fall by as much as 19% led by the 1925D NGC MS66FB spiral to $1,965. Buffalos and Walkers also display further softness. Mint State and Proof Type attempt to maintain solidarity, yet several are caught taking a tour south. Liberty Seated Half Dimes with Stars attempt to correct this as hefty advances chase select Mint State examples higher. Gold Type is still under pressure as evidenced by the insatiable demand for Double Eagles. Leading the golden surge are $20 Libs taking a $50 bounce to $1,700 in MS64.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

To a Coin Collector, Confidence is Priceless

Everyone wants to be confident about the quality of a coin. When it's a CAC-verified coin, you can trade with confidence.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, this year alone, CAC has purchased over $50,000,000 worth of CAC verified coins..

Want confidence in the value of a coin? Look for the CAC sticker.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Hotel California Booked Market Weathers Winter Discounts

While attendance and business transactions were categorized as brisk at the recently concluded FUN convention, there were both subtle and more obvious signs that areas of the certified market have softened. Though quality slabbed coins in the $5K range were selling with no apparent resistance, certified wonder coins in the 6-figure class were clearly receiving more tire kicking than purchases. Buyers trolling the aisles were looking to stretch their funds with more moderate purchases, and sellers with big ticket items were anxious to gain liquidity, although none really wanted to slash their asking prices. News on the bourse of the weak sell-through rate on a plethora of high ticket pre-FUN auctions may have contributed to a feeling of uncertainty. Conversely, the host auction by Heritage played out a much more favorable scenario. When the gavel became silent and the multitude of Bidding paddles were set down, over $52 million had been logged in the record books. Considering today's economic uncertainty, this sale was surprisingly strong, actually realizing $2.2 million more than the 2008 installment. Although there were no million dollar pieces to buzz about, the Orlando epicenter matched last year's impressive mark of 60 certified lots thundering home in excess of six figures. The sum of these magnificent slabbed treasures—$13.3 million— accounted for a quarter of the total sales. Also, Heritage's sell-through rate of over 80 percent was equally remarkable. One of the elite, a superb 1920S $10 Indian graded PCGS MS66 went to a floor Bidder for $431,250. This could be a very important market barometer as the last time this exact coin appeared publicly was at the 2007 FUN auction where it realized $402,500. Granted, not all the coins went through the stratosphere as many examples (as evidenced by the 200+ minus signs) sold under current market. A quick spot-check of a few six-figure rarities that actually sold at last year's FUN reveals a not to gloomy outcome for them in 2009. Examples include an 1841 Liberty Seated Quarter, the Pitman/Kaufman NGC PR66, and the 1844 brother to this, the Pitman/Kaufman NGC PR66 Quarter (now donning CAC certification) which brought $345,000 and $322,000 respectively in 2008. Now, a year later, each brought home $299,000. This confirms that sellers will bend a bit, and buyers are still actively pursuing problem free, top tier material. Both factions, average collectors and well-heeled aficionados, are taking a long look at this hobby and have concurred that they are comfortable with the diversity, liquidity and the more than fair measure of stability that is exemplified here.

Stack's eclectic offerings comprising the three session Americana sale set in frigid New York, January 12-14, realized a warm $4 million; this, on the heels of the nearly $70 million in certified coins and currency auctioned in Florida, bodes well for the New Year. The next big test for market stamina and dealer liquidity is less than 3 weeks away as the Long Beach gala is scheduled for February 5-7.

As for sight-unseen trading, the continued slide for Classic Silver Commems has been punctuated by a substantial loss surrendered by NGC MS67 Lafayette Dollars. Attempting to see daylight, the 1921 Alabama 2X2 PCGS MS65 examples are rising to $945. Classic Gold NGC specimens of both Pan-Pac slugs also got squashed. The most noticeable is the double digit spanking for MS67 Octagonals. PCGS isn't immune here as MS66 1904 Lewis & Clark examples explore a $9,800 sight-unseen Bid after auction malaise served up a CAC example at a considerable discount. The proud Morgan Dollar contingent is taking a hit as a pair of PCGS 6-figure slabs sustain the largest dollar loss. Settling into the new market confines are the conditionally rare 1886O and key 1895O, each grading MS65, now Bid at $109K and $120K respectively. Peace Dollars have a better time of it, yet the popular 1921 PCGS MS66 examples are driven back. Interestingly, a bargain was had when a tougher PCGS MS63 1924S sold on an internet-only venue for $285 while a sight-unseen offer of $430 was ignored. Without the usual visible supporters, both Mint State and Proof Type have each absorbed significant double-digit losses, the most devastating being sustained by the conditionally rare. Leading this pack are NGC MS67 Liberty Seated Quarters sans Drapery. Even Proof Gold Type is finding Stella looking back over her shoulder. Mint State Gold Type has a few dissenting votes as Spot rolls back to $811. Attempting to spark a rally are MS62 $5 Libs riding a $50 surge to $345.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

State Of The Market: Mixed Gold Bugs Welcome New Venue

Without a doubt, those living in the coin world have enjoyed an unprecedented period of prosperity. Nonetheless, as this planet's economy continues to flounder, the numismatic house has had to cope with some leveling, but has yet to have the rug pulled out from under it. All things considered, the certified numismatic market has done a rather nice job of adjusting to the worldwide financial quagmire. As evidenced in Florida, business, while perhaps not heavy in six-figure wonder coins, was otherwise active. The quartet of public sales and bourse canvassing proved that collectors will continue to collect, and dealers will continue to deal.

While sight-unseen Bid levels have indeed eased back, and minus signs have been plentiful lately, the *CCDN Coin Market Index* is nearly 16 points higher this week, at 926.79, than it was a year ago, at 911.22. To their credit, many dealers have taken the necessary steps to keep their businesses afloat, and without government intervention. After careful assessment, inventory which is stale or fallen from favor has seen Ask prices reduced a bit. These various corrections, primarily targeting generic Type as well as some marginal material, are paramount in reflecting a more accurate state of the certified market. In turn, every sale, albeit at lower levels, is generating more capital to facilitate more salient acquisitions. The key to dealers' survival is to attain those eye appealing, problem-free slabs at realistic prices. Of course that is easier said than done as the finite supply is and has been under intense pressure. Without question, top quality and rare certified coins are still selling through virtually all venues. Obviously, some cash reserve was still available after millions were shelled out in Florida. A perfect example of this is the David Lawrence internet-only sale of 1/19. An NGC PR63 Cameo 1879 $4 Flowing Hair Stella realized a very strong $143,750. Clearly, sellers are willing to budge to make a sale, and buyers are still feeling comfortable to part with a sizable expenditure. Other high-end collector coins aren't willing to ease up at all. In this same sale, a key 1901S Barber Quarter, graded PCGS VF20, realized $27,600.

Certainly, a strong assist comes from the precious metals component in its continuing role in helping to keep things buoyant. The yellow metal remains the key player here. As buyers look to capture Gold coins, other than the long wait, premiums over Spot are the biggest negative. Responding to this amazing demand, Heritage has just closed the books on their first weekly internet-only generic US Gold Type coin auction, January 21. Bidding increments are as little as one dollar, and there is **no buyer's premium**. The inaugural sale, consisting of 24 lots totaling 641 coins, brought in just over a half million dollars. The second auction is now underway and features CAC approval on 2/3 of the lots. CAC makes other news this week as founder John Albanese announced that his company is now prepared to add to their current 200 dealer membership by once again accepting applications from full-time dealers. Those wanting to join, and thereby gain authorization as a submission center, have had to wait nearly a year since the opportunity first arose, back in May of 2008.

With a few more losers than gainers, the sight-unseen market is mixed. Classic Silver Commems show numerous losses, though only a handful of those sliding are displaying double digit setbacks. Heading the exodus are the Pan-Pac, grading NGC MS66, and the Missouri 2X4 in NGC MS62. In the other corner, Classic Gold is the big loser. Each within the series has at least one example donning a loss. Nine are saddled with dual-digit rollbacks as the Grant With Star wearing PCGS MS64 colors, is leading the retreat by 20%. Silver Dollars have always been a popular choice, and in the current market, a rather raucous statement has been made on their behalf. Feast your eyes as nearly 200 Morgans feature higher Bids. A balanced assault is targeting everything from generics in low grade to the desirable 1895S as slabs from both services take as much as a 32% jump in MS62 and MS63. Through all this excitement, as our readers can see in this week's market column, a few Morgans managed to fall through the cracks, led by an NGC MS65 1878S. This particular coin sold on the internet for $132—some 37% under a standing sight-unseen offer. Another Gem graded by NGC, a 1926D Peace Dollar, sold for $315 while a $460 blind Bid watched. With Gold Spot hovering around $860, select Gold Type remains as hot as ever with Double Eagles roosting at higher levels in several grade columns.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales–related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Scouting Party Hits So Cal Shores
Gold Commems On The Mend

The west coast migration has already begun in earnest. Dealers and collectors of all shapes and financial standings have ascended on Southern California's shores for a host of pre-Long Beach festivities. While most are ecstatic to have just taken a break away from the grips of one of the coldest winters on record, market watchers are also hopeful that the Golden State will be keeping things warm in more ways than just the weather. Some prominent dealers have already hung out their shingles on temporary digs and are wheeling and dealing in airports, restaurants, hotel rooms—you name it. A small group of especially savvy dealers has secured a ballroom at the adjacent hotel, facilitating pre-show transactions with a swanky touch, as is the tradition at the Long Beach gala. In this market, all are anxious to get ahead of the competition, and if possible, make their show before the big event officially gets underway.

Early Copper enthusiasts are hoping to spring a bargain or two from the second installment of Goldberg's Naftzger sale in Beverly Hills. Other numismatic faithful will be making the trek to Superior's sale, and then a quick click down the coast to Irvine, to check out Bowers & Merena's "Collector's Choice" auction before ending up at the feature sale by Heritage. All know that advanced scouting is the key, and should afford the best opportunities to cash in on some profitable deals throughout the show's duration. While several dealers are still advising us that big money is poised on the sidelines waiting to enter, the rules of their participation have been altered somewhat. Certified rarities and wonder Type coins must be *all there and then some* before the coffers will open. Those coins that lack the "wow" factor or just don't cut it will be sent packing to be recycled on some other venue. All participating would like to come away a winner at this long running expo which some have referred to as the Super Bowl of numismatics. Veteran collectors know chances are quite good that those coins burning a hole on want list pages will most likely be making an appearance here. There may even be additional incentive to do some careful canvassing around the bourse as bargains are sure to be had from some dealers looking to abandon stale stock and turn those stagnant slab into cash.

Even the Fed is lending an indirect hand to the equation as they saw fit to leave the short-term interest rates unchanged at 0% to 0.25% after their meeting, which wrapped up 1/28, in the hopes of stimulating the ever weakening economy. Certainly, the precious metals have taken this cue, in particular Gold, and will be a critical component to the bull continuing its long run. With the yellow metal perched around $900, action is not only bubbling on the numismatic front, it is boiling over for those on the perimeter looking to park whatever remnants of paper securities into the perceived (and time tested) safer haven of hard assets.

The sight-unseen market is actually quite busy on the eve of Long Beach. While Classic Silver Commems hang another handful out on the discount rack, their golden counterparts are turning things around, poised to score a touchdown. For a welcome change, buyers actually need these coins. Over a dozen are taking in as much as a 21% advance this week. On a dollar basis, leading the surge are the $50 Octagonal Pan-Pac Slugs as MS64 and MS65 representatives roll ahead by as much as $13K. With Spot Silver rising, several more plus signs appear in the Morgan compound with the popular 1897S riding up in multiple grades. Peace Dollars receive some attention too, as the semi-key 1928S accelerates to $350 in MS63, courtesy of a solid $50 bounce on the internet Bidding highway. Mint State Type remains stable with only a couple dissenters. Buffalo Nickels and Walkers are attempting to keep damage control at a minimum, yet both are observed taking some hits. Although several better Gold Type issues and high-end specimens are enjoying some modest discounting, generic $20 Saints and Libs remain "summertime hot" with advances noted through MS66.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

CERTIFIED COIN DEALER newsletter

Pre-Long Beach Auctions Total $10 Million Sight-Unseen Market Sends Mixed Signals

The New Year is barely 2 months old, and as winter's cold and snow blankets most of the nation, the certified coin market is still keeping the numismatic arena quite warm. While it is still early in the year, quality coins have weathered the storm and are still selling at a good clip. Many at auction, especially early Copper and Gold, are still causing Bidding paddles to do battle, bringing runaway prices. Conversely, dealers and collectors attending the pre-Long Beach battery of sales weren't surprised when average Type coins, slabs with toning issues or those saddled with unrealistic reserves didn't sell or brought lower prices. All in all, a not too shabby $10 million has already been hammered home in the succession of pre-Long Beach sales. Now, more than ever, if a coin is going to be inventoried or bought for a customer, it must be problem-free and possess robust eye appeal.

Another aspect of the hobby that has been able to galvanize both new hobbyists and veteran dealers is the advent of CAC certification. This John Albanese brain child has eased or eliminated many doubts as to a coin's quality for the grade. The peace of mind for both novice and expert is easily worth in many instances much more than the premium to obtain that little green (or gold) sticker. Even sight-unseen buy offers for some high octane sitckered rarities are appearing on the electronic dealer-to-dealer trading venues, many of these in the six-figure class. Blind trading at this level was virtually unheard of at any time in the recent past.

While set-up day at Long Beach went off without a hitch, dealers who had been chomping at the bit were especially excited that the show had finally gotten started. Many had already put in a week's work of wheeling and dealing at various offsite venues in the Golden State prior to the big dance and were anxious to show off some highly saleable new inventory. A few dealers mentioned that Classic Commems, especially those lustrous original toned coins with CAC verification, are probably some of the best buys on the floor. Problem-free early Type is still being pursued with a vengeance, and with Gold Spot apparently not seeing its shadow, still over $900 an ounce, anything yellow has a bull's-eye on it.

With cash flowing rather freely in So Cal, the sight-unseen market is mixed. Although several minus signs are greeting us, within the Silver Commems, both the Stone Mountain and 1935S San Diego are getting a bump up in low to mid grade as buyers feel these coins are just too cheap. Morgan Dollars are still a lively group on both sides of the aisle. While several inevitable minor rollbacks are observed due to the wealth of lots available at auction, a few bargains were also present for vigilant Bidders. The most prominent payday was when a rather scruffy NGC MS61 1894 Morgan sold at the Goldberg's sale for $2,300 while a viable blind offer for $2,800 watched from the sidelines. Mint State and Proof Type are still fairing well with ANACS slabs back in the mix enjoying as much as a 25% advance for select Copper and Nickel entries. Gold Type remains blistering hot with PCGS and NGC slabs enjoying parity for Double Eagles, with MS65 Saints now claiming $1,530. High Reliefs are also getting a solid boost as an aggressive sight-unseen buyer is now offering $24,500 for either PCGS or NGC examples.

At the conclusion of the west coast sortie, many of the coin brethren will be heading to the country's breadbasket next week for Scotsman's Midwest Winter Sale. This annual event commences on Friday the 13th and is punctuated by the Golden Gate collection of Indian Head Half Eagles. We have listed several of the sale's other collector friendly coins herein.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Double Eagles Soar
Morgans Motivated, Commems Collapse

The western swing is now over, and Long Beach has left most dealers feeling rather upbeat. While established hobbyists were busy plugging some holes in their collections, new collectors were engaging in earnest conversation about the precious metals, and many a convert from straight bullion to numismatic Gold was made. While the old saying, "It never rains in Southern California" didn't live up to its promise, Goldberg's Pre-Long Beach sale and the main event Heritage auction actually shone as bright as a clear, sunny day. While neither sale had more than a basketful of certified wonder coins selling in the six-figure plus range, sales in the more collector friendly ($500 -$5K) range picked up the slack quite admirably. This, after all for most participants, remains a pleasurable hobby, something to pass the time, to buy, sell and trade coins and improve collections. Dealers more than ever depend on true collectors to keep the market afloat, and in turn maintain their livelihood. The good judgment to ease back on asking prices for some average material or to set more realistic reserves at auction, continues to pull in that ardent base. And while the market sorts things out, minor losses on stagnant inventory are keeping dealers in the black.

Another staunch ally of the numismatist are the precious metals. With Gold Spot firmly over the $900 hurdle, trading in the $950 range, the ever-popular MS65 $20 Saints are now Bid at $1,710 sight-unseen, a level not seen since 1990. Just how strong is the demand? If we channel back to last Saint Paddy's Day when Gold spiked over $1,000, the highest blind Bid for MS65 caliber Saints was $1,475. With Gold still trading about 8% under its historic high, these Double Eagles are soaring a couple of hundred bucks higher. Even the electronic dealer-to-dealer trading venues have gotten a spark from this. The workhorse CCE is reflecting a 50% increase in the number of posted Bids and Asks since January 23rd. Total dollar value is also a powerful $12 million higher. Of course, Mint State Gold Type is seeing a significant surge, and Morgan Dollars are also viewing an up-tick in action. As one might expect, the sight-unseen market is still adjusting after the multitude of lots hammered home in California. Once again, still searching for the bottom are the Classic Silver Commems. Over a dozen are rolling back to the tune of double digits, and another 60 plus are also losing steam after auction malaise. Classic Gold is also under fire as the leaders have fallen hard. This is one area where Gold has lost its luster. The 1905 Lewis & Clark MS66 examples have slid down to $17,500, and the popular Pan-Pac Quarter Eagles in MS67 are down as well, but not quite as much. Attempting to make up for the chaos in the Commem corner, Morgan magic has lit the afterburners. No question Spot Silver trading over $13 has brought some new and aggressive Bids here. Nearly 100 are posting advances, and this is a balanced attack covering generic as well as solid increases for keys like the 1903 and 1904 San Francisco pair, each posting double digit gains. Leading this surge is the popular 1887/6 O as NGC MS63 examples ride a 40% jump to $1,300 blind Bid. The rush hasn't followed the Peace Dollar series as several are spotted sliding back after less than stellar auction results. Proof and Mint State Type have weathered the storm a bit better, although a few have lost some ground. Buffaloes reveal a herd heading south in multiple grades, with decreases ranging from just a few hundred to a few thousand. Generic Walkers are picking up some momentum showing some moderate increases this week. Early Gold Type finds several examples adjusting to the new game, led by $10 Capped Bust Eagles rolling back by 20% for PCGS MS65 slabs. Conversely, Mint State Gold Type is dazzling as Double Eagle mania is in full force. Buyers remain on the throttle as the generic golden express rolls higher across-the-board.

Pre and Post Saint Patrick's Day celebrations (of the numismatic type) will take place this March. First off, the ANA National Money Show will get underway in Portland, Oregon, March 13-15, with an auction by Heritage. Then after the green beer is digested, the Whitman Baltimore show, March 26-28, featuring an auction by Bowers & Merena, will wrap up this festive month.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's but command some premium over non-P/L strikes.

Market Follows The Golden Rule
Fresh Half Eagle Cache Cashes In

While many dealers are physically striving to keep warm this winter, the Golden blast furnace is supplying ample convection to many of the chillier numismatic sectors. On the heels of a prosperous run at the St. Louis show and Scotsman auction, most dealers have retuned to their home camps, and while the market metamorphosis continues, new collectors are sprouting up all over the landscape. Some are driven by financial fears, others are fascinated by the "hobby of the kings" that is still performing in rather royal fashion. Everyone seems to be on the same page, hunting for condition, rarity and value. What may have been the battle cry and mainstay in the past is still true. However, collectors not able to shell out for a glorious MS65 Type coin have in many situations set their sights on equally attractive and perhaps undervalued slabs in lower grades. After all, an eye-appealing MS63 or MS64 at a fraction of the price of a full Gem makes enormous fiscal sense. A perfect example of this was seen in the results of the "Golden Gate Collection" from the Scotsman sale. Sixty three 1911S Half Eagles all met rescrves and flew to new nests. While the majority was graded MS62 by PCGS, prices realized ranged from 5% under Bid ($1,955) to as much as 65% ($3,335) over current market. Assigned grade was an authoritative guideline—eye-appeal and strike were deciding factors. Certainly, some may be gunning for an upgrade or a CAC sticker, yet even in this otherwise depressed economy, this sizable cache was eagerly absorbed into the market. This is not only a testament to the continued strength of rare coin appeal, it also confirms that popular and fresh certified offerings in the collector-friendly price territory have enthusiastic buyers.

The non-stop flight to hard assets, especially Gold, is giving the numismatic brethren some gargantuan thrust. As the yellow metal closes in again on the magic $1,000 benchmark, frenzied demand for Double Eagles continues, as anything golden rules. As major dealers, mom & pop operations, and internet entrepreneurs battle for the precious nuggets, premiums escalate. While certified MS64 and MS65 Saints have been the bread-and-butter, Golden twenties in lesser grades have rocketed almost under the radar. Some 20 years ago, at their apex, these popular slabs were trading blind at $1,680 and $4,075 respectively. While MS64 examples are closing in on the sight-unseen record, they are still a far cry away from the lofty MS65 standard. Yet with Gold Spot so strong, and demand accelerating at every turn, MS62 and MS63 slabbed coins *are trading at record levels,* reporting in at $1,235 and $1,335 respectively this report. For comparison, at the height of the run-up in May 1989, we were looking at $620 and $935 sight-unseen. Of course Gold was also trading at $376.75 then. However, last March when Gold thundered over $1,000, blind Bid for MS63 was $1,150 (19% over melt), and the MS62 sightless offer was at $1,025, a mere 5.5% over melt. Today we are looking at a hefty 35% premium for those nearly forgotten MS62 slabs. Dealers can vividly remember when no one wanted Saints in this low-end grade; global chaos and unprecedented demand seems to have cured this problem, carrying those lesser Uncs along for the ride.

So as dealers maintain vigil on the various electronic networks, putting out the SOS for Gold coins, other areas of the market are working on their own stimulus plan. The Classic Silver Commem slide is down to a trickle, which can be construed as a victory. The biggest loser here on a dollar basis is for the oft weakly struck 1934 Maryland. NGC MS67 examples roll back $170 after internet indifference. Classic Gold lost a tad more luster as a quartet eases back. With Silver cavorting near $14, Morgans deliver a few modest advances targeting some collector-friendly pieces. While a measure of losses are noted, most are only off a few percent. Peace Dollars are making some noise; over 2 dozen of the popular series are wearing gains. Commoners in MS63 are inching up to $24, and a key 1927 installment grading MS64, rides a nice 24% boost to $360. Mint State and Proof Type are holding their own as nary a bargain or sell-off is in sight. Walkers show a few stumbling back within the short-set, and Franklins observe several coming up short, but none are really having their bell rung. Buffalo Nickel supporters continue to dry up as 1924 NGC MS66 specimens take a 40% whack after veritable internet annihilation. Standing Liberty Quarters still have standing offers for generic MS64 scribes, and only a few minor losses, nothing to text home about. Gold Type hits the afterburners as both Eagle and Double Eagle compatriots are surging up. MS61 and MS62 $10 Libs are pounding out double-digit gains. The crowd favorite, MS65 Saints, top $1,770, and NGC $10 Indians rebound in like grade to $3,450.

Dealers and collectors are excited about the upcoming ANA National Money Show in Portland, Oregon. This show, scheduled for March 13-15, will feature an auction by Bowers & Merena, the only official auction of the ANA in 2009. Next month holds yet another big event, the Whitman Baltimore Show, coming up March 26-28, also including a Bowers & Merena auction.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

National Money Show On Tap
Blind Bids Becoming More Visible

The certified rare coin market is ready to take to the road again, and perhaps, as is fitting for the month at hand, action will be roaring in like a lion. After digesting a rather fruitful visit to So Cal, most of the vast dealer network and staunch collector connection have made plans to head back to the left coast, albeit for the Pacific Northwest this journey. Portland, Oregon is the destination, and having a productive, insightful run at the ANA National Money Show, March 13-15, is their goal.

While world markets attempt to make order in their financial house, so far, average Joe hobbyists are still anxious to plug holes in their collections with quality, mid-priced coins. Most true numismatic customers are quite excited to have an assortment of certified coins, not only as a collection, but as a store of value. Very few have shown an interest to sell, as those prized mid-ranged toughies have performed quite well. Accordingly, many of the crowd are quite happy and willing to park more funds into quality, eye-appealing slabs. Veterans to the hobby are certainly receptive to find that their well-tended cabinet has gone up in value. They just prefer to see the escalation take place at a measured pace. While it's exciting if market prices skyrocket ahead, the consensus is that behind this push, investor dollars are most likely at work. When the run up is over, and the non-collector vanishes, the house of overpriced certified coins comes crashing down. Collectors want none of the Wall Street style manipulation here. One could argue that there is indeed a relationship of sorts between the Dow and the rare coin market. By looking at the chart herein, it is clear that a leveling off of the ***CCDN CMI*** occurred as the Dow fell off a cliff. Gold prices obviously play a major role in numismatic market strength, or lack thereof, as well. With Spot maintaining a residence in the $950 range, premiums for US Gold coins, and any other yellow bullion coins for that matter, are still going through the roof. There is such a frenzied demand that the supply wagon just can't satisfy the current ravenous appetite.

CCE's Generic Market has come to the rescue on several occasions. How strong is the demand right now? Consider this: since the 1st of the year, a total of $1,005,860 in certified Gold Double Eagles had been traded on that network, yet on 2/24/09, in a single trading session, $215,580, or nearly 25% of the total for 2009, was logged in. In an attempt to satisfy the gold bugs, Heritage's weekly internet-only Gold auction has also rallied to the cause, reeling in over $1 million in its first full month. Visible participants are also making a return. The number of listings on CCE has increased by over 7,000 in the last week, and total value of the Bids has also raised the ante over $11.5 million.

Over the next fortnight, as final preparations and strategy sessions are made, dealers and collectors have a host of internet-only auction options to choose from. Seemingly, any given day of the week, buyers or sellers can let their mouse do the walking. One of those cyberspace entrepreneurs and innovators, David Lawrence, is tweaking the process further. Now in their fifth year of internet-only sales, notable themed auctions and one-day rocket sales are generating considerable action. Presently, the Pratt Family auction, featuring 100 registry quality Morgan Dollars, dubbed the "Million Dollar Morgan Auction" is up for grabs. John Feigenbaum, President of David Lawrence Rare Coins, is also about to celebrate the first anniversary of the Dominion Grading Service. The DGS label, replacing the old PCI moniker, started taking submissions on May 1, 2008, and in the first 10 months has slabbed and graded approximately 6,800 coins. Building an active network of dealers to aggressively trade this material also bodes well for the average collector, and this ongoing enterprise.

With few exceptions, sight-unseen trading is on the light side. Even Classic Silver Commems are only displaying a skosh of retreats. Classic Gold with only a pair easing back also seems to have stabilized. With Spot Silver trading in the $13 neighborhood, Morgan generics grading MS63 and MS64 are getting a boost from buyers reporting in at $35 and $45 respectively. As our readers can ascertain from the market columns, very few bargains were made available in the busy $500 and under club. Mint and Proof Type remain resilient, with nary a bargain to be had. Mercs have seen little action up or down; however, a trio of Buffaloes is grazing south. Walkers in the MS65-MS66 category still have active suitors as blind Bids inch up. As we mentioned earlier, with Gold trading in the $950 range, premiums continue to escalate. Leading the volley are the ever-popular $5 Liberty Heads taking a 6.25% advance for MS62 examples. Several other denominations are inching up in multiple columns, and $20 Libs and Saints are feeling measured heat, marching in at higher levels across the blind Bidding palette.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" - Lowest asking price during the week prior to publication (*w*eek old); "**m**" - Lowest asking price during the previous three weeks (*m*onth old); "**t**" - *T*rade during the most recent month; "**lm**" - Lowest asking price appearing *l*ast *m*onth; "**lt**" Trade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXIV No. 10 March 6, 2009 Single copy price $4.00

Gold Premiums Hold
Morgans On The March, Lincolns Red Hot

Weather-wise, March has thundered in like the proverbial lion. While the eastern seaboard shovels out, and much of the country attempts to keep warm, many a student and snowbound population look forward to a much needed spring break. As some anxiously book passage south, much of the certified coin market has managed to stay north. After shaking off the immediate fallout last September, many of those left standing gathered up what cash remained, and the flight to precious metals and other tried and true tangible assets was at full bore. Not surprisingly, what was touted as a safe haven and store of value in bullion has been augmented to include the numismatic sector, a strategy welcomed by rare coin dealers. Many veteran collectors that were shell-shocked last fall and put certified coin acquisition on the backburner are beginning to come back to the market, too. Much of the knowledgeable numismatic tribe has had time to digest and objectively assess ramifications following the whirlwind collapse, and after the dust settled, they have found that rare, certified coins, and numismatic offerings in general, have either held their value or out-performed many alternative investment options. With the help of third-party grading, detailed population reports and various efficient electronic trading venues, certified coins have established a reputation as the most readily salable of all collectables, especially when one takes into consideration the massive dollar volume of slabs which trade sight-unseen.

Although Gold Spot has seen some of its luster grazed recently, falling down near the $900 level before rebounding somewhat later in the week to $927, the lure of the yellow metal has continued ushering in many new collectors. Premiums are still at record levels for $20 Saints, and as market-makers have a hard time supplying generic MS65 caliber slabs, many are reaching down to lower grades such as MS62 and MS63 material which is available in quantity, driving them to record sight-unseen levels. Though perhaps not the raging bull of the past seven years, business definitely remains robust for those who have appropriately adjusted to the changing market.

As March madness revs up, the ANA National Money Show and host auction by Bowers & Merena, March 13-15, in Portland, Oregon, as well as the Whitman Baltimore gala following shortly after, March 26-28, will be a very telling indicator of the coin market's health. In the interim, the ubiquitous internet-only auction venues are proving that solid four- and five-figure coins are still capable of realizing astounding prices. Low population, high-grade rare dates in most series are performing well. As an example, Lincoln Cents, especially full Red designated early Coppers, remain steaming hot. Take a look at the results from a David Lawrence event conducted March 2. A pair of San Francisco conditional rarities, including a 1916S PCGS MS65R, captured $10,925, and the 1923S in the same grade and service thundered to $21,850. The combined PCGS population for this pair is 38 (22 and 16 respectively) with none designated higher. This reinforces the fact that active buyers are clearly keeping this series bubbling. Of course, the log jam of unfulfilled requests for the first of 4 bicentennial Lincoln Cent Commemoratives is fanning the flames even higher. Sight-Unseen trading has also picked up in some areas. This doesn't include the Classic Silver Commems, though with only a trio falling, led by the 1922 Grant Memorial's retreat as PCGS MS66 examples fall to $820, a moral victory of sorts can be recorded. ANACS and ICG slabs attempt to build a base as the popular Lincoln-Illinois is receiving considerable demand and double-digit escalation in several columns. Classic Gold suffers *one* significant casualty as a PCGS MS67 golden version of the 1922 Grant reels back to $2,900 after a Bidder unceremoniously pulled the plug on a Heritage internet-only auction. Silver Dollars are not disappointing us this report. A plethora of plus signs are visiting both generic offerings and better date mintmarked Morgan fare. Leading the salvo are the popular, typically boldly struck, but heavily abraded 1883S issues, as MS64 brethren claim $3,600. Peace Dollar pandemonium is also making considerable noise. One buyer has sent out the *SOS* for the majority of the series in low to mid-grade. Over a dozen feature double-digit advances; on a percentage basis, the tough 1924S PCGS MS63 leads the pack, and on a dollar level, the key-date 1934S delivers a winning $3,600 blind Bid for both MS64 slabs. Walkers are privy to a new $40,000 sight-unseen Bid for the only 1942S graded MS67 by PCGS. This buyer is also willing to fork over $75,000 for a blast white example in the same grade. Mint State and Proof Type offer no discounts to shoppers. With Gold Spot down around 5% from last week, sight-unseen Bids for much generic Gold Type haven't drifted back, and demand is **still solid** for many mid-grade examples. In fact, Type III $20 Libs and $10 Indians are enjoying modest advances in several columns. Little heard from Proof Singles feature a buyer looking to reel in full Red 1939 Lincoln Cents with PR64R examples up by as much as 35%, and PCGS PR67R specimens rolling to a $1,350 sight-unseen Bid.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

March Madness Begins
Double Eagle Premiums Soar

March madness begins in earnest this week as the certified coin caravan rolls into Portland, Oregon, for the ANA National Money Show and host auctions by Bowers & Merena. By the show's end on the Ides of March, dealers and collectors should have a much better idea as to the prevailing market's strength. Currently, the bread-and-butter material is still mid-price certified offerings. Those on the hit parade include early large Coppers as well as Indian Head and full Red Lincoln Cents. Problem-free keys within all Barber series are also wanted. Of course, just about any Gold coins have an enthusiastic following. The numismatic heavyweights and coveted trophies in the 6-figure neighborhood and beyond are still being shopped around. Some collectors advised us that after finding their 401Ks have been royally decimated, the main concern is keeping whatever nest egg that hadn't been scrambled into a new and safer nest. Those that have done their homework have found that rare certified coins have performed quite admirably through this fiscal fallout and are still maintaining solid prices. As the public at large looks for a safer shelter, remnants of the paper collapse are being infused in the numismatic arena.

This vote of confidence is making many dealers from across the country very happy. One well-known east coast dealer said he is seeing many more of his mainstream customers not just passing the time reviewing double row boxes, but now appearing with checkbook in hand. He said that action started to pick up at FUN, and the same pattern presented itself at Long Beach. A driving force and the harbinger of much ongoing action is in the Gold Type sector. As Gold Spot takes a brief dip below $900 after some profit taking, it seems more players on the sidelines are rushing in to take advantage before the expected rebound. This momentum is keeping bourses at both major and regional shows a hotbed of activity, and dealers are attempting to corral as many Mint State Double Eagles as possible. Now, as veteran collectors and newbies caught up in the whirlwind put out the call, the swift acquisition of problem-free Gold coins is very difficult, without paying a significant premium.

CCE's Generic Market continues to be a bellwether. Since this format was introduced in November 2007, $20 million in Double Eagles alone have been traded on that exchange. Heritage has also stepped up with its weekly no buyer's premium internet-only Gold sale. Stack's is making a niche with a foray into their own internet-based Gold bullion coin acquisition plan as well, which is geared towards investors and those looking to add some numismatic leverage.

The sight-unseen market is eyeing some welcome action. Classic Silver Commems spring ahead with some positive news. A wealth of plus signs are sprinkled throughout with a pair enjoying double-digit escalation including the Grant Memorial without Star muscling ahead by 11% for PCGS MS62 examples. The golden counterparts show some softness this week, as the Grant Memorial without Star wasn't so fortunate, drifting back a tad. Morgan generics are getting a boost from MS63 through MS65, the latter now claiming $114. No real bargains slipped through the cracks, yet a few "CC" PLs eased back a bit. Peace Dollars remain tight as MS63 slabs top $25. Mercs are also getting some modest, yet still significant attention. Full Banded MS65 and MS66 NGC slabs are now advancing as one buyer is Bidding $28 and $38 respectively. Proof Singles feature the 1939 Lincoln Cent on the move again in the ultra tough PCGS PR67RD columns as blind Bid tops $1,385. One savvy east coast buyer is hoping that this offer will spring one of 27 out from hiding. Although Gold Spot is still trading in the same range, extreme demand for $20 Libs and Saints is pushing slabs in the MS61-MS65 columns significantly higher. Leading on a dollar basis, MS63 $20 Libs tack on a solid $130 over last week's sight-unseen Bid, and MS65 Saints roll up to $1,940 on the strength of a $170 advance.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Saints Marching In
Key Dates Command Respect

After a busy sortie to Portland for the ANA National Money Show, dealers have little time to regroup before heading to the east coast for the Whitman Expo in Baltimore, March 26-28. What dealers discovered in Portland is that collectors of average means are making a significant impact. Buyers are judiciously attempting to acquire as many quality slabs in that favored mid price category as they can. Contrarily, over promoted series like Classic Commems are vulnerable in this or any market. Of course Gold was a show stopper with nary a collector turning their back because of rocketing premiums. Collectors are shrewdly attempting to purchase as many quality Gold coins as funds allow. Several dealers advised us that, in addition to the "Do you have any Gold?" conversation, buyers followed up in brisk repartee as to the availability of key date collector coins. The escalating demand for prime 19th and 20th century keys in *the other metals* has buyers scrambling from table to table for this bread-and-butter material. Much to their chagrin, supplies are quite limited, and it's taking more effort and cost to unearth what is available. One well-known western dealer said the demand for many of the still unheralded "CC" keys within the Liberty Seated series is on the upswing.

Given the option, most dealers and collectors would be thrilled to own some CAC certified coins. While generic CAC designated Dollars and Classic Silver Commems may trade for slight premiums, if any, over non-stickered fare, better dates and rarities are where this little green bean pays off. An example: at the recently concluded Bowers & Merena auction, a pair of 1926S Buffalo Nickels met the hammer. One was graded PCGS MS63 CAC, the other a PCGS MS64. The CAC coin brought nearly 70% more than the MS64 example, realizing $25,300 vs. $14,950. Does the CAC sticker make a difference? The answer is a resounding yes, especially when rare dated material or when the subject coin is one of those notoriously weakly struck mintmarked Buffaloes from the 20's.

While some dealers and collectors go over new acquisitions and strategize for the upcoming Baltimore event, others are still anxious to pick some new certified coins. Adding further excitement to the mix, the varied weekly internet-only cavalcade schedule has made a new entry. Heritage has announced that in addition to its Sunday and Tuesday certified coin auctions, a new regular Thursday installment is scheduled to begin in early April. CCE is attempting to keep pace with the ravenous appetites of buyers of Gold. In fact, on St. Patrick's Day, a phenomenal $501,680 in certified Double Eagles traded. We have to harken back to early October to find a ***full week*** that eclipsed the trading in this single day. As for other certified trading, in the last month, the number of listings on that exchange is up over 23%, and the total value of Bids has increased nearly $28 million.

Classic Commems remained soft in Portland. Led by the 1933D Oregon Trail in PCGS MS66, several specimens rolled back substantially. Classic Gold is on the outs with a PCGS MS66 Pan-Pac Dollar now at $1,700. Morgan and Peace Dollars remain very popular venues, and that is generally affecting slabs valued at $500 and under. Mint State and Proof Type continue to weather downward pressure. A 1944S Walker graded PCGS MS65 sold for $230 at auction, a full $70 less than current sight-unseen Bid. The final year of the series is showing some new desire as the 1947 entry is fashioning a modest advance in the MS66 column. Franklin Halves are reporting in with some welcome news. Nearly a dozen are rolling in with double-digit advances. Gold Type is hot and volatile, while trading in the $880 range on Wednesday, the aftermarket saw the golden jets hit the afterburners recovering and racing to $960. This intense action prompted some market makers to actively increase Bid on Saint-Gaudens Double Eagles in a wide range of dates and grades.

Following the Baltimore show, dealers will head to the Santa Clara Expo in California April 2-5. Next up is Vegas, where another Collectors Universe show will take place, April 16-18. This time it's the inaugural PCGS Members Only Show which will be held at the Venetian Hotel, featuring several seminars along with a cozy, trade-n-grade atmosphere.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

March Going Out Like A Lion
Stack's Sale Reels in Over $6 Million

Rare coins, especially certified examples, never fall out of favor with collectors. To be sure, many mass marketers of generic offerings would challenge that statement. However, as many assets remain depressed, certified coins are an exception, having safely weathered the financial storm. After an upbeat run in Portland at the ANA, the momentum appears to have traversed the great divide. That impetus is now ever-present in a host of Pre-Baltimore Whitman Expo dealings. Early reports confirm that buyers, perhaps a bit hesitant earlier in the year, are now returning to the bourse and auction floor with pen in hand. While business has been brisk, the game plan has changed to include more activity on both sides of the ledger for popular four and five-figure slabs. An example of this newer and more practical mind-set was seen with the results of the Stack's pre-Baltimore auction. While reeling in an impressive $6.2 million, the four session sale was very heavy in "prime-time" collector/investor material. In fact, no fewer than 80 certified coins were hammered home in the 5-figure range. Consignors realize that certain aspects of this market have drifted south, but are doing what they must to retain a high sell-through rate. Time will tell if this same pattern will play out at the upcoming Santa Clara show, April 2-5, with an auction by Superior.

Dealers across the country are receiving inquiries, and sales are picking up. Many veterans to the hobby are perhaps a bit biased. They have always contended that numismatic items are the world's greatest collectable. But now they are really showing their mettle as a store of value. Corroboration is seen within the ***CCDN Coin Market Index*** reporting in at 932.93, compared to 920.53 one year ago. Even after the economic house of cards came crashing down, strength and confidence in rare coins have actually increased. Of course, unprecedented demand for US Gold coins has helped immensely. With Gold trading down $9 from this time last year, MS61-MS65 $20 Saints have seen an average increase of 34% in that same period. Interestingly, the only grades wearing a slight decline are the MS66 and MS67. Just how strong is demand for Double Eagles? Consider this: over $1.2 million in trades took place on CCE's big generic market in March. We have to look back to June 2008 to find a month with more activity. Yet let's not lose sight of the key dates from popularly collected series. Once again, the 1926S Buffalo Nickel has seen a herd of excitement. This time, a PCGS MS64 example is the focus, thundering home to an amazing $43,125 at the Stack's sale. Such few conditional rarities have been making the rounds attempting to strike while the market is hot.

$20 Saints PCGS	3/28/08 S/U Bid	3/27/09 S/U Bid	% Change
MS61	$925	$1,250	+35.14%
MS62	$990	$1,280	+29.29%
MS63	$1,015	$1,355	+33.50%
MS64	$1,085	$1,485	+36.87%
MS65	$1,460	$1,950	+33.56%
MS66	$2,350	$2,300	−2.13%
MS67	$7,200	$7,000	−2.78%
Gold Spot	**$949**	**$940**	**−0.95%**

With a major show and several auctions to occupy dealers, sight-unseen trading is light. Classic Silver Commems are giving up some ground. In fact, as our readers can see within the Market Column, the NGC MS65 Alabama, although selling for $632 at an internet-only venue, still left money on the table as a sight-unseen Bid of $700 remains in place. Classic Gold continues to be a bit of an enigma; they are Gold, and have low mintages, yet are still looking for support. Take a look as the NGC MS67 1904 Lewis & Clark examples have fallen back after a dazzler sold in a Heritage internet sale for $13,800. Silver Dollars maintain their might as Morgans surrender nary a bargain, and MS64 commoners rally up to $47. Peace Dollars offer up some minor discord, but nothing unsettling as demand for most of the series is stable. Mint State and Proof Type are enjoying the status quo with no significant discounting to report. Mint State Gold Type remains strong, yet we spot a minor drift for generic Double Eagle offerings.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales–related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *week* prior to publication (*week* old); "**m**" – Lowest asking price during the previous three weeks (*month* old); "**t**" – *Trade* during the most recent month; "**lm**" – Lowest asking price appearing *last month*; "**lt**" *Trade* appearing *last* month; "**ot**" *Trade* older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Superior Galleries Out Of Auction Business
Fresh Coins In High Demand

Most numismatists would agree that we are in a buyer's market, partly as a result of the broader weakening of the economy. The crisis that unofficially began with the collapse of Lehman Brothers in September 2008 resulted in a "liquidity crunch" that, according to many economists, is the worst it has been since the Great Depression. This current economic disaster may have contributed to the indefinite suspension of Superior Galleries' auction department—this news breaking only 24 hours before their now cancelled auction at the Santa Clara Expo. "Cash is King" and those coin buyers who have cash are able to dictate the terms of a sale. It is much tougher for dealers to make a sale right now—especially for certified coins that reek of anything like generic. To put a number on it, let's say coins ranging in value from $500 to $10,000, and to define which coins: Mint State Type, Proof Type, Morgan Dollars and Commemoratives, where, let's face it, availability of such items favors the buyer and not the seller. It is not enough to convince a potential buyer that a coin has a low population. It is not enough to convince the potential buyer that the coin offered is at levels not seen since the late 1990's. It is not enough to "teach" the potential buyer what exactly "eye appeal", "solid for the grade" and "pedigree" are worth when it comes time to resell. It is not enough to finance a sale at terms very favorable to the potential buyer. Do it all, however, and that *might* be enough.

On the other hand, strength still exists in the current market. Those coins that meet the strict criteria of today's more educated buyers remain in high demand. Material that is truly rare, fresh on the market, having eye-appeal, originality and a low pop will definitely change hands for solid prices. This pattern has played out quite clearly all year long with numerous examples seen at the three biggest shows held thus far in 2009, which include the Orlando FUN show, ANA's gala in Portland, and the Whitman Baltimore show. In each of these major gatherings, dealers shared with us fairly similar reviews supporting the above-mentioned market conditions. Heritage realized a healthy $14 million in their post-Baltimore show sale, March 28-31. A number of highlights are listed herein.

This week's sight-unseen market is especially active on the heels of a national coin show. Silver Commems continue to see widespread discounting, though several plus signs have popped up. Gold Commes aren't so lucky, as only minus signs are seen this week. Dollars, both Morgan and Peace, are in the spotlight, with over one hundred moving up. Commoners maintain the status quo with MS65 Morgans at $114. In April 2008, these bellwether coins of the sight-unseen market were Bid at $141, that being the most recent peak. A slow, continuous descent occurred since then with only one or two very minor interruptions, which brings the situation to where we are today, some $27 lower. There is a fair amount of commotion occurring for Morgan Dollars in their original GSA holders as seen on Supplemental Page D. Mint State Type is flush with lower Bids primarily for small Silver denominations after poor auction performances. Gold Type is also lower as a result of a weakening Gold Spot, which is currently just over $900 an ounce. Proof Type is also softening, affecting the majority of Nickel designs. Mint State Buffaloes are mixed with many issues now weaker. Walking Liberty Half Dollars are in an even worse situation, with none advancing. Proof Singles are witnessing a handful of declines, with no denominations escaping.

NGC just announced that their project of developing an online verification tool through coin imaging is now available for use. This tool's main function is one of deterring counterfeit holders. One million coin images are now in the database, and its use is free of charge, unlike the NGC Census Report. Such online verification utilizing coin images is not new to numismatics, as DGS, formerly PCI, has done exactly that since the inception of the company last year. In other third-party grading news, PCGS will hold their Members Only Coin Show, April 16-18. The inaugural event will be held at the Venetian Hotel in Las Vegas. This is a private show, and adding to the exclusivity of the event, table holders are required to submit a minimum of 100 coins at the walkthrough rate.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Some Sacrificing Today For A Better Tomorrow
Sight-Unseen Market Adjusts To Auction Results

The month-long stock market rally does not appear to have infiltrated the sight-unseen coin market. Bid levels are mostly lower this week. Will dealers with rather large inventories of certified material hold onto their wares hoping for Bids to increase? Or, will they decide that it is better to generate cash flow now. Even if it means selling something at a discount - or for less than what was paid originally to acquire it for inventory. Generating cash flow now has the possible consequence of depressing Bid levels even further. In some cases, however, that may be the only viable option to maintain liquidity. Four major auctions took place in March - two by Bowers & Merena, one by Stack's and one by Heritage. Some fabulous coins sold. Many achieved incredible price realizations. Sadly, though, there are no highlights to report from the Superior sale. As most of us know by now, Superior Galleries is no longer in the rare coin auction business. The sale to have taken place in Santa Clara a week ago did not take place, and that is that.

This week's sight-unseen market Bid levels reflect the huge number of transactions that took place in March by virtue of those four major auctions. Silver Commems continue to see widespread discounting, though there are a few plus signs to report in this week's chart. The slide in sight-unseen Bid levels for Gold Commems continues unabated. Morgan Dollar and Peace Dollar Bids are under downward pressure, similar to the Silver and Gold Commems, following last month's voluminous auctions. The list of casualties includes the ever popular 1883S in PCGS MS61. Other decliners also in PCGS holders are the even more popular 1890CC and 1891CC in grades MS64 and MS65, and the 1884CC in MS67. Be aware that even though the vast majority of Morgan Dollar Bids are unchanged, many recently sold for less than current sight-unseen Bids. That said, it suggests that in these trying times, where consignors are resigned to let coins go "at any price" it might pay to sit in on these auctions—*Bluesheet* in hand—and snag a few "above average quality" coins at present Bid levels. PL Morgans are witnessing moderate losses overall, though some demand remains. Mint State Copper Type is unchanged this week unlike Proof Copper Type where a number of issues decline. Mint State Type Nickels suffer declines in Bid for one of the rare coin market's all-time great promotional items. That is the 1883 No Cent Liberty Nickels where NGC examples have lost ground in MS65, MS66 and MS67. For discussion's sake, let's say it was someone's idea to start a promotion on these. What would one have to spend to acquire the goods at sight-unseen Bid? The capitalization of No Cent Nickels in NGC MS65 is roughly $260,000 (1,729 x $150). The market cap in MS66 is almost exactly half that at $130,000 (421 x $310) and in MS67 the market cap is, ironically, very near to exactly half of that at $65,000 (49 x $1,315). In theory, one could acquire every Gem or better 1883 NGC No Cent Nickel on the planet for just over half a million dollars. Uncirculated Silver Type is mostly unchanged with a few modest declines, notably Capped Bust Half Dollars in MS61 and Barber Half Dollars in MS64-MS66. Mint State Gold, presently one of the most active areas of the entire sight-unseen market, reflects that activity with a passel of plusses and minuses. One of the most charming U.S. Gold coins, the Type 3 Indian Head Gold Dollar, is now Bid at $265 in MS61. Early Gold Type remains mostly steady save for a couple early Half Eagles which are moderately lower. Walker's have one lone gainer this week, the 1943 in MS63. The decliners in this series reflect the fact that of the hundreds of certified Mint State Walkers that sold last month - many for solid prices - some went off at less than Bid. Leading the downward march are the 1940S in PCGS MS66 and NGC in like grade, where coins sold at auction for $834 and $690, respectively. Proof Singles are lower with no denominations escaping. Better Date Washington Quarters remain soft with several selling at retail auction for less. Stack's is set to conduct its sale of the Saint Ludovico and Firth of Clyde collections on April 22-23, 2009 in Rosemont, Illinois. Several of the certified highlights of the sale are included herein.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

CERTIFIED COIN DEALER newsletter

*CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXIV No. 16 April 17, 2009 Single copy price $4.00

Bids Jump For Generic Dollars
Auctions Little Threat To Sight-Unseen Market

The sight-unseen market is gonna be OK. A pretty bold statement, perhaps, given the fragile economy, tentative financial and credit markets, declining Gold and Silver bullion prices and a Presidential administration that is reaching its "100 days in office" marker amidst lots and lots of new programs and paradigms. Nevertheless, some believe the bulk of the sight-unseen sell-off is over. There is no question that Bid levels suffered in recent weeks. There are more declines this week. The buyers, however, have absorbed over $100 million via auctions since January. The sellers, hopefully, are replenished with cash, and may in turn become buyers again, albeit, at the lower levels. In addition, it will be several months before we see the likes of that amount of material entering the marketplace in so short a period.

The next auctions on the horizon are the Stack's, April 22-23, and the Ponterio and Associates, April 23-25, sales. Both are set to be conducted in Rosemont, Illinois. Ponterio is the host auctioneer for the Chicago International Coin Fair, scheduled for April 23-26. Stack's is taking advantage of this popular venue to conduct its sale there as well. Both auctions focus on world coins and other esoteric numismatic collectibles. These sales should not threaten the sight-unseen market in the form of discounted material. Heritage will conduct their official auction, beginning April 29, for the Central States Numismatic Society's 70th Anniversary Convention in Cincinnati. This sale appears to contain a good deal of fresh material. These are the types of coins that bring "all the money" and therefore should not pose any significant downside risk to present Bid levels. Of course, there are often a few specimens that fall through the cracks, leaving many participants stunned.

Indeed, the dearth of auctions and major conventions that would normally supply the market-makers with their quota of generic coins has prompted dealers to "hit the wires" and start placing Bids on coins needed for inventory. Starting with the Morgan Dollars, common dates have increased in MS63, MS64, and MS65. Similarly, generic Peace Dollars have advanced in MS63 and MS64. Silver Commemoratives are reasonably subdued this week. To be sure, there is some discounting taking place, resulting in a number of minus signs scattered throughout the charts. However, the activity is nothing like last week where there were over 150 minus signs. Gold Commems tell a similar story. The only discounting to report here is the 1917 McKinley Memorial Dollar which results in a couple of decreased Bids on both sides of the PCGS/NGC ledger. Last week's storm of 31 declining Bids has blown through. Copper and Nickel Mint State Type are unchanged this week. Silver Mint State Type is privy to a mix of plusses and minuses. Of particular note here are the numerous increased Bids for Standing Liberty Quarters. The scattershot minus signs reflect a few discounted sales. Proof Copper, Nickel, Gold and Silver Type is "status quo" this week. There is not one plus sign or minus sign to report, which compares favorably to last week when there were 15 minus signs. 1943D Mercury Dimes in PCGS MS65 FB holders are now Bid $28, sight-unseen, making them the most affordable Gem FB Mercury Dime in the series. Coincidentally, the 1943D is also the highest population coin in 65FB at PCGS where they have encapsulated some 4,071 coins at that grade level. This represents over 10% of the entire series population in PCGS 65FB at 40,465. PCGS and NGC Walkers suffered a few minor declines this week. Proof Singles' Bid levels are under siege once again. Among the casualties are a 1938 Washington Quarter in NGC PR63, a 1936 Walker in PCGS PR64, and a 1936 Buffalo Nickel, Satin Proof, in PCGS PR67. A fixed price list from one of the larger coin dealerships includes a number of such coins offered for sale, even including a handful with a CAC sticker, at less than Bid. This type of widespread discounting is also responsible for many of the minus signs seen in Commems these past couple of weeks.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services (determined through careful study of market activity including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks/Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Quiet Market? Not According To The Market Column

The Market column is published every fourth week of the month, and is therefore part of this week's installment. This is a window into the tens-of-thousands of certified coin transactions that take place every month. A perusal of the Market column reveals almost at a glance which coins trade routinely, which coins do not, which coins routinely bring well over sight-unseen Bid, and which coins do not. Such information provides a snapshot for every series regularly published in the ***Bluesheet***—Morgan and Peace Dollars, Silver and Gold Commems, Mint State and Proof Type, Buffalo Nickels, Mercury Dimes, Walkers and Proof Singles. The Market column is a synthesis of results that includes every public auction, wholesale fixed price lists, coins offered for sale on the electronic networks, and any other piece of information that is obtainable to us. A detailed explanation of how the Market column functions, including the various symbols used, can be found on the top of page 2a.

Silver Commems and Gold Commems continue to lose ground as the relentless trail of auction results and wholesale Asks erode sight-unseen Bids. The good news here is that the number of minus signs this week is modest—four on both the PCGS and NGC Silver Commems chart. Three each on the Gold Commems. The codes scattered throughout the Market columns, e.g. "a", "w", "t", indicate how lower Bid levels have been established. The 1924 Huguenot and 1936 Cleveland, the former in PCGS MS63, the latter in PCGS MS65, are both presently Bid at $105. Both issues sold at public auction in the last few weeks for $104. A PCGS MS65 1926 $2½ Sesqui, presently Bid at $2,000, sight-unseen, sold at retail auction for only $1,955.

The Market column for Peace Dollars in PCGS MS64 is instructive. A 1921 example traded "t" for $550, which is the current Bid. A 1922 sold at auction "a" for $39. Bid is $35. A 1924S traded hands for $900. Bid is $900. A 1934S went off at auction for $3,595. Bid is $3,600. Let us move to the MS66 column. The Market column data is sparse, which in itself speaks volumes. There have been no relevant known auction results or wholesale Asks for quite some time on the '27D, '27S, '28, and '28S, just to name a few, as indicated by the absence of codes.

Mint State Type didn't suffer much in the way of declining Bids this week. However, if the sentiment is that Bids are too low for a variety of coins, one need only look at many of the fresh auction results to understand why. Dealers have been paying at least $775 for any TII Standing Liberty Quarter graded PCGS MS66FH, yet one just sold at auction for only $720. Dealers are paying $412 sight-unseen for Liberty Seated Dimes with Legend in PCGS MS65 holders. One sold for $403. Similar results abound for nearly twenty different Type coins on the chart, leaving money on the table.

Proof Type: not one plus sign or minus sign. Does that imply a lack of activity? Hardly! The Market column is awash in recent auction results. Let's look at Proof Barber Halves in PCGS 65. The Market column indicates a coin sold for $2,185 against a sight-unseen Bid of $1,980. Keep in mind that the $2,185 reflects the lowest transaction figure for a PCGS PR65 Barber Half in the last 28 days. In this example, we've looked at nearly a dozen retail auction results ranging in price from $2,185 to nearly $4,000. To drive the point home, the Market column often represents slabs of the worst possible quality for the grade. For popularly traded issues where it might be safely assumed that numerous examples have traded recently, this is indeed very valuable information. The 1916S Mercury Dime is a population 17 coin in PCGS MS67FB. Current sight-unseen Bid is $3,200, yet the lowest priced coin we could find is offered wholesale this week "w" for $7,750.

Walkers are mind-bogglingly bereft of Bid changes this week. On the PCGS side and in the MS66 column, there are auction results for nearly every issue from 1933S through 1947D. Nearly all of these auction results are fresh (they are denoted by an "a") and indicate the lowest price realized brought by an example of that issue in that grade in the last four weeks. Listings in the Market column with an "oa" refer to an old auction result or one that is usually more than 30 days old. Finally, a blank space in the market column indicates that there are no auction results or no known offers to sell an example of that coin going back 60 days or more.

Gold Spot closed at over $900 for the first time since early April, and numismatic Gold has gained significant popularity as bullion supplies have dwindled to the point of being unable to meet demand. While most Type coins listed herein are lower than the last go 'round, some substantially, like the $2½ Indians in PCGS MS65 by 14%, a few are higher, including NGC MS66 $20 Saints, now Bid $2,450. As we go to press, Stack's has nearly completed their auction in Rosemont, Illinois, and the first session brought in a total of nearly $774K.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (month old); "**t**" – Trade during the most recent month; "**lm**" – Lowest asking price appearing last month; "**lt**" Trade appearing last month; "**ot**" Trade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Preserving your *modern* art

NCS Modern Tier

Professional conservation from NCS reduces the ill effects of improper storage or exposure to environmental contaminants — substantially improving a coin's visual appeal. And now we've created Modern Tier, a service designed especially for modern coins.

Submit any uncertified coin struck from 1970 to present for $22.50. This one flat fee includes conservation from NCS expert technicians and NGC certification. Following conservation, your coins are transferred to NGC, where they are graded and encapsulated in the NGC holder, the ultimate protection for long-term preservation.*

Industry-leading conservation, certification and preservation starts at just $22.50 per coin.

* NGC does not grade coins with detrimental surface conditions. Coins not eligible for NGC grading will receive NCS details grading and encapsulation. Not genuine coins or coins with altered dates or mintmarks will be returned uncertified.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXIV No. 18 May 1, 2009 Single copy price $4.00

Central States Show Active Sight-Unseen Bids Dwindle

Dealers have made the trip from the Chicago International Coin Fair, which took place April 22-23, bringing in over $4 million in associated auctions totals, and are now attending the Central States Numismatic Society's 70th Anniversary Convention, which runs April 30 through May 2. Reports from the invitation only PNG Day, April 29, were as expected: most of the action consisted of strong dealer-to-dealer transactions, with a smattering of astute collectors lucky enough to have been invited. The following day also went pretty much as planned. Public traffic was good, and everyone was buzzing about the Heritage auction. Sessions One and Two have already realized over $5.5 million, and some real excitement is brewing about the Platinum Night portion. This special section of the sale, in progress as we go to press, includes several six-figure coins, and also features the "King of Coins" 1804 Class III Dollar, which many expect to capture well over $2 million. With a current Bid standing at $1.95 million, such an expectation seems quite within reach. Once the remainder of the auction is tallied up, and the Paper Money sale is added, we should be looking at quite a large total from this convention, likely exceeding $10 million. Certainly, a key factor in the success of such auctions, is what is being offered: fresh, original, rare, high-end certified material. This is what buyers want today, and they obviously have the money to acquire it when it's offered. What is no longer tolerated is the same old stuff that has been making the rounds for the last several years. This material is not selling anymore, at least not anywhere near its price just a year ago. Those auction companies and dealers who have gotten this message by dumping their drek early on are definitely reaping the rewards in today's market.

The sight-unseen market for certified coins remains somewhat soft overall. This is especially visible surrounding a major coin show and auction as many dealers will curtail if not remove their Bids altogether. The lack of dealer Bids can result in widespread declines, especially when the material is sold at public retail auction for less than prior wholesale levels. This week's *CCDN CMI* is down a quarter point from last week at 927.60 primarily due to drops within the Classic Silver Commemorative series, Mint State Type Gold, Morgan Dollars and Mercury Dimes. Classic Silver Commems have been under pressure for several years now, and this week is no different. Without a dealer promotion or new book to spark interest, collectors simply are not building sets of this series. Several reasons for this may exist. One is that there are just too many coins, and learning to grade all 50 designs is too difficult. Another reason is that many within the series are not "spread coins," where the difference in price between grade levels is nominal. This is primarily due to the fact that these coins did not circulate, and just about all that were purchased were kept in Mint State condition. This has also impacted these coins' availability. As the majority were put away at time of issue, nearly all remain purchasable today, with no real stoppers. The *CCDN CMI* for Silver Commems is at 613.66, a low not seen since March 18 of 2005 when it was 610.83. Morgan Dollars are mixed this go 'round with commoners declining in MS63. Select San Francisco minted entries are higher in grades MS61 through MS63. Peace Dollars are stable overall with no real action to report. Mint State Gold Type is seeing lower Bids as premiums continue to subside a bit. Common date Double Eagles in MS61-MS63 are lower while a few smaller denoms drop in the MS61 grade column. Higher sight-unseen Bids are in place for late date Buffalo Nickels in light of these slabs constantly trading in retail venues for less. PCGS Mercury Dimes are lower in MS66 through MS67FB as demand wanes and declining Asking prices prevail. Generic Walking Liberty Half Dollars are holding the line at $100 Bid for MS65 examples graded by PCGS or NGC. Interestingly enough, ICG examples are wanted at higher levels of $107 Bid by way of the CCE Big Generic Market platform. A quick glance at the trading history here will reveal that none have sold to date.

The next stop is Atlanta, Georgia where dealers and collectors will converge yet again for another numismatic gathering at the Whitman show, May 14-16. Stack's will hold their El Dorado auction, May 14-15, and we have included several highlights from this sale herein.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

NGC Silver Type Explodes Sell-Through Rate Phenomenal At CSNS Auction

Dealers have closed up shop at the Central States Numismatic Society's 70th Anniversary Convention. Next up on the coin show circuit is the Whitman Coin Show in Atlanta, May 14-16, featuring the Eldorado sale by Stack's. Following the Atlanta stop, dealers will head west to Long Beach for the thrice-yearly installment of the Long Beach Coin, Stamp and Collectible Expo, scheduled for May 28-30. As always, Heritage is the host auctioneer for this PCGS parent owned show. Additionally, the Goldbergs are set to conduct a pre-Long Beach Show sale in Beverly Hills, May 24-26. Reports from the recently concluded CSNS varied, of course, depending upon a dealer's or collector's perspective. Fact is that a few of the more visible items offered at the auction brought less than what consignors paid for them in recent years. The sell-through rate at the sale, however, was fantastically high, at over 90%, and $38 million worth of material changed hands. As we have learned from significantly larger markets, the value of an asset is important, but even more important is the constant buying and selling of the asset.

Silver and Gold Commem Bid levels are refreshingly status quo. The only volatility comes by way of the 1926 $2½ Sesquicentennial with Bid advancing to $950 for an NGC holdered coin at the MS64 level. After weeks and months and years of discounted sales of Commemoratives, it is reassuring that of the many transactions in this market segment in the past week, not one led to a decrease in Bid. The sight-unseen market for certified coins takes an exhilarating turn this week–especially for coins encapsulated by NGC. A prominent, national dealership, and part owner of NGC, has stepped into the fray and Bid up a number of Silver Type issues in Mint State and Proof. And when we say exhilarating, we mean exhilarating. It is one thing when an esoteric issue with a very low population is Bid to a higher level. But in this instance, we are referring to Type coins that are very widely dispersed among dealers and collectors and trade every day. For example, Barber Dimes, Quarters and Halves are higher in PR63 through PR67, inclusive. In the case of the Barber Quarters, there are over 4,000 examples that have been certified by NGC in this grade range. Also included in the Bidding frenzy are Liberty Seated Dollars with Motto, Trade Dollars and Morgan Dollars. Without exception, Bids have advanced in grades PR63 through PR67 for each issue. Let us point out again that populations here are well into thousands of coins for each Type. Proof Morgan Dollars include well over 4,000 pieces certified by NGC for the relevant grade range. Proof Trade Dollars number over 2,000 in NGC holders while the Liberty Seated Dollars contribute another 1,000 or more pieces in Proof. We note that Liberty Seated Dollars with Motto in NGC PR63 are Bid nearly 40 percent higher than PCGS examples in the same grade at $2,500 and $1,800 respectively.

Gem Uncirculated Trade Dollars, of which there are 158 floating around, are now Bid at $6,750, up $1,500 from $5,250 one week ago. Capped Bust Quarters, Small Size, of which there are roughly 160 in NGC MS63 holders, are Bid at $2,800. Last week, this issue was Bid at $1,880. To conclude, Bids have advanced for all Capped Bust Silver coinage–Half Dimes, Dimes, Quarters and Halves. In the case of the Dimes and Quarters, both the Small and Large Size coins are targeted. All the Barber denominations are also higher, as are Trade Dollars. Even the somewhat esoteric Draped Bust Dollar, Heraldic Eagle, which is Bid higher in MS62 and MS63, involves some 40 coins for the common 1799 and 1799/8 varieties. Mercury Dimes are, for the most part, stable with some discounted sales leading to the softening of Bid for a few issues. Many, many Mercs sold well in advance of sight-unseen Bid at the recent retail Heritage auction. The nature of the sight-unseen market is such that if two specimens of a particular issue sell at auction, where one realizes, for example, twice Bid and the other one comes in below Bid, the ***Bluesheet*** will reflect the lowest price realized in the Market column, published the fourth week of each month. A few select Walkers have undergone an increase to sight-unseen Bid in MS66. Those issues are the 1941D, 1944 and 1945 with dealers paying $178, regardless of what they look like. Proof Singles is one of those areas always potentially hard hit when a large chunk of material comes up for sale. As is the nature of sight-unseen marketplace, there always seems to be "just one more coin" that no one wants at nearly any price. To that end, a number of issues in NGC PR67 holders are now Bid even lower. With Silver over $14 an ounce, it is interesting to note that a 1959 PCGS PR64 Franklin Half Dollar–a coin that is precisely 50 years old–is Bid at only $8.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.
